Complete the sentences.

For every 3 sheep, there are cows.

For every 2 cows, there is sheep.

Complete the sentences to describe the counters.

For every 2 red (R) counters, there are yellow (Y) counters.

The ratio of red counters to yellow counters is :

For every yellow counters, there are red counters.

The ratio of yellow counters to red counters is :

Reading

Last Saturday, my family and I went on a crazy trip to the zoo! First, we saw a mischievous monkey escape from its enclosure and swing from tree to tree. Then, a group of zebras ran wild, causing everyone to laugh and cheer. At lunchtime, a cheeky parrot stole my sandwich right out of my hand! The highlight of the day was watching the playful otters slide down rocks and splash into the water. By the end of the trip, we were all tired but thrilled by our wild adventure.

1. What did the mischievous monkey do?
2. How did the zebras make the visitors feel?

3. What happened to the author's sandwich?
4. What was the highlight of the day?
5. What does the word "cheeky" mean in the context of the parrot?

Writing

Write a short paragraph, describing how Odysseus felt once he left the island of the Cyclops.
